PROFESSIONAL SUMMARY

Backend-focused Python and Django Developer with hands-on experience building, deploying, and maintaining production-ready web applications. Strong knowledge of REST APIs, SQL databases, authentication systems, and scalable backend architecture. Actively seeking junior backend or full-stack developer roles.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
Frameworks	Django, Django REST Framework
Frontend	HTML, CSS, Bootstrap
Databases	MySQL, SQLite
Tools & DevOps	Git, GitHub, Postman, VS Code, Nginx, Gunicorn
Concepts	REST APIs, CRUD, Authentication, ORM, MVT, Deployment

PROJECTS

Bablu Printing Press | December 2025 – Present
1. Developed a live business website using Python and Django for a commercial printing press.
2. Implemented dynamic service listings, category navigation, and inquiry forms.
3. Deployed on cloud server using Nginx and Gunicorn for performance and stability.
4. Live Website: https://babluprintingpress.live

Fashion Hub | October 2025 – November 2025
1. Built a full-stack e-commerce application using Django, Python, and SQL.
2. Implemented authentication, product catalog, cart, and order system.
3. Designed responsive UI with Bootstrap.
4. GitHub: https://github.com/anujthakur2004/FashionHub

EXPERIENCE

Industrial Training – Python Full Stack Development
TechCadd Computer Institute | Nov 2024 – May 2025
Worked on Django-based applications, REST APIs, SQL databases, and version control using Git.

EDUCATION

Bachelor of Vocation – Software Development
Lyallpur Khalsa College, Jalandhar | GPA: 8.3

CERTIFICATION

Certificate in Python – TechCadd Computer Institute (2022 – 2025)
